4-Week Intermediates Lightroom Course

Intermediates Lightroom Photography

This 4-week course is to give intermediates the opportunity to develop their productivity and creativity in Lightroom and other software.

Course Content Summary

- Collections, Publishing & Organising
- Advanced Editing in LR
- Creative Editing - NIK
- Simple Photoshop

Time:

- All evening classes start at 18:45 and finish at 21:15
- Please allow yourself 15mins for parking and being ready to start on time.

Places

- Places x 8. - Typically, 5-8 attendees
- For a class to go ahead, there must be a minimum of five clients booked for that particular date. Should there be insufficient interest, alternative dates will be offered.

Commitment

- 4 consecutive weekly evenings for 2.5hrs each week.
- If you can't make **one** of the weeks, then you can attend a future course for the missed week at no extra cost.
- If more than one class is missed a small re-booking fee is required to attend all missed classes.

Cost

- Select **Lightroom Level 2** from the dropdown menu on booking option.
- If you are interested in spreading the cost of a number of events (courses/workshops/tuition service) over a 12 month period, interest free, take a look at my [Pick n Mix Plans](#). You will receive a discount on this course cost and any other events you choose as part of a 12 month photography tuition package Minimum commitment is £43 a month (£525pa).

Terms

- Please [read my terms and conditions](#) before booking as you will be bound by them upon receipt of money paid.

- Cancellation less than 4wks prior to event date - no refund
- No show on the event - loss of place/money
- Rebooking fee applies for changing class date if less than 4 weeks before event date or for re-booking a missed class.

Description

- Adding Textures
- Cloning and removing objects

You will also be set practical assignments, allowing you to use new skills at home.

Is this for me?

For regular users to Adobe Lightroom who want to learn how to maximise using LR tools and other editing options to improve workflow and editing techniques and output.

Level 2 - Aimed at:

- Those who have completed [Level 1 Beginners Lightroom](#) or already have a good grasp of Lightroom Basics and want to enhance their knowledge and use of its functionality and tools.

Included with the class

- Class booklet/notes
- Tea & Coffee during the break half-way through

Equipment needed

- You will need a laptop and Lightroom installed from the start of the course. See Adobe Lightroom site for minimum specs and subscription/purchase options.
- You will need a laptop (MAC or Windows) running at least Windows 8 OS and with a current version of Adobe Lightroom Classic installed.
- Note paper and pen

Further Classes/Courses

This course is the perfect next step. Most people continue onto [Level 2 Courses](#) in [Photography](#) and [Lightroom](#) and combine this with [workshops](#) and/or [private tuition](#).

Or you may prefer to **take the four week course as private tuition lessons?** I offer a block of four times two hour lessons to suit your pace and availability (daytime/weekdays only). Just get in touch to discuss or [view the booking page](#).

Benefits

This course teaches you the more advanced features of using Lightroom. Above and beyond just storing images and doing basic editing you will learn how to organise your images into collections that automatically update with your best photos and improve dramatically the time and editing of your photos.

You will then go on to learn how to edit photos easily and make all the critical adjustments required to then export or print your images at various sizes and formats.

In practice, this course will also help you improve your eye for a shot as you become more aware of the improvements that could have been made in camera.

How you will learn

Alan is passionate about photography and [a qualified photography tutor](#). He will engage you in discussion and be more than willing to answer as many questions as possible on the night.

Alan will demonstrate Lightroom through a projector and explain each topic and then you will have time to do in class practical's by replicating and trying for yourself the demo Alan has provided.

1. You will be encouraged to ask questions and engage throughout the night so come prepared to ask any question you need an answer to.
2. You will be provided with a comprehensive topic notes to take away and use for future reference
3. You will be given assignments each week to help you cement the theory learned and raise any questions/issues the following week with Alan to clarify.
4. You will be provided with a set of example images to use throughout the course so that everyone is working on the same image throughout the demonstrations and practicals.
